User Stories Document

Features & Acceptance Criteria Breakdown

Group Members: Galarza César, Erazo Isaac, Gualotuña Brayan

NRC: 30716

Date: April 20, 2026

Project: Web System for "FLOVA" Comprehensive Rehabilitation Clinic

Client: Flores Villalva David Alejandro

"What is important is not being able, what is important is trying"

1. Introduction

This document details the breakdown of system features into actionable User Stories for the FLOVA Clinical Management System. Following agile methodologies, the scope is divided into 10 main Epics (Features), which are further decomposed into specific User Stories containing precise Acceptance Criteria, Estimations, and System Behaviors.

2. Feature 1: User & Role Management

This feature manages system access, ensuring that patients and clinic staff have appropriate permissions within the platform.

2.1 US-01: Level Assignment

ID	US-01
Role	As a System Modeler, I must assign user levels to ensure proper software management.
Estimation (Points)	5
Priority	High (1)
Acceptance Criteria	
Context	The administrator must assign levels: Administrator, Receptionist, Therapist, Patient.
Event	• Filling out required information. • Automatic assignment of Level 1 to the Admin.
Specific Behavior	Once Level 1 is assigned, this user will have full access to the entire system.
Adverse Behavior	If registration is incomplete, access levels cannot be assigned.
Responsible	Galarza César (Scrum Team - Developer)

2.2 US-02: Patient Registration

ID	US-02
Role	As a New Patient, I want to create an account using my ID (DNI) so I can access the scheduling system.
Estimation (Points)	3
Priority	High (1)
Acceptance Criteria	
Context	Public Landing Page / Login Portal.
Event	• User inputs DNI, Name, and sets a secure password. • System validates DNI uniqueness.
Specific Behavior	The system creates the profile and redirects the user to the Patient Dashboard.
Adverse Behavior	If the DNI is already registered, an error message prompts the user to log in instead.
Responsible	Erazo Isaac (Scrum Team - Developer)

3. Feature 2: Clinic Profile & Services Catalog

This feature allows the clinic to display its mission, vision, and the specific treatments offered by its specialists.

3.1 US-03: Service Display

ID	US-03
Role	As a Patient, I want to view the available physical therapies to select the one I need.
Estimation (Points)	2
Priority	Medium (2)
Acceptance Criteria	
Context	Landing Page - "What we do" section.
Event	• User clicks on the Services menu. • System fetches active services from DB.
Specific Behavior	Displays Traumatological, Sports, Neurological, and Respiratory therapies clearly.
Adverse Behavior	If database is down, display a cached version of the services with a connection warning.
Responsible	Gualotuña Brayan (Scrum Team - Developer)

3.2 US-04: Specialist Directory

ID	US-04
Role	As a Patient, I want to see the specialist profiles so I know who will be treating me.
Estimation (Points)	2
Priority	Medium (2)
Acceptance Criteria	
Context	Landing Page - "Professionals" section.
Event	• User navigates to staff directory. • Views profiles for David Flores, Juliana Vasquez, etc.
Specific Behavior	Displays the name and specialized areas of expertise for each therapist.
Adverse Behavior	Missing profile images load a default professional avatar.
Responsible	Galarza César (Scrum Team - Developer)

4. Feature 3: Digital Intake & Medical History

Replaces physical paperwork by allowing patients to submit their demographic and medical context before their first appointment.

4.1 US-05: Patient Demographics Form

ID	US-05
Role	As a Patient, I want to fill out my personal data so the clinic has my medical record.
Estimation (Points)	5
Priority	High (1)
Acceptance Criteria	
Context	First-time login portal.
Event	• User fills out Age, Gender, Blood Type, Address, and Medical Insurance.
Specific Behavior	Data is saved to the DB and linked directly to the patient's ID.
Adverse Behavior	Incomplete mandatory fields trigger validation UI warnings.
Responsible	Erazo Isaac (Scrum Team - Developer)

4.2 US-06: Exam & Document Upload

ID	US-06
Role	As a Patient, I want to upload my lab results or doctor's referrals to provide context to my therapist.
Estimation (Points)	8
Priority	Medium (2)
Acceptance Criteria	
Context	Intake Form - Document section.
Event	• User attaches a PDF/Image file. • Submits form.
Specific Behavior	File is stored securely; a note reminds the user to bring physical copies if digital is unavailable.
Adverse Behavior	Files over 5MB are rejected with an explicit error message.
Responsible	Gualotuña Brayan (Scrum Team - Developer)

5. Feature 4: Specialist Agenda Management

Provides the clinic staff with the tools to manage their working hours and block out unavailable times.

5.1 US-07: Define Working Hours

ID	US-07
Role	As a Therapist, I want to set my daily availability so patients only book when I am present.
Estimation (Points)	5
Priority	High (1)
Acceptance Criteria	
Context	Therapist Dashboard.
Event	• Therapist selects start and end shift times for Monday-Friday. • Saves schedule.
Specific Behavior	The system generates selectable 45-minute blocks based on the shift hours.
Adverse Behavior	Overlapping shifts prompt a schedule conflict error.
Responsible	Galarza César (Scrum Team - Developer)

5.2 US-08: Block Occupied Slots

ID	US-08
Role	As a Therapist, I want to block out specific times (e.g., lunch, emergencies) to prevent overbooking.
Estimation (Points)	3
Priority	Medium (2)
Acceptance Criteria	
Context	Therapist Calendar Interface.
Event	• Therapist clicks on a specific time block. • Marks it as "Unavailable".
Specific Behavior	The slot is immediately removed from the patient-facing booking interface.
Adverse Behavior	Cannot block a slot that already has a confirmed patient appointment.
Responsible	Erazo Isaac (Scrum Team - Developer)

6. Feature 5: Core Booking System

The central engine that allows patients to select slots and schedule their therapy sessions.

6.1 US-09: Interactive Time Selection

ID	US-09
Role	As a Patient, I want to select an available time block similar to picking a cinema seat, to schedule my visit.
Estimation (Points)	8
Priority	High (1)
Acceptance Criteria	
Context	Patient Booking Interface.
Event	• User selects desired date. • System displays grid of available slots.
Specific Behavior	Selected slot highlights visually and proceeds to check-out/confirmation.
Adverse Behavior	If another user books the slot simultaneously, a "Slot no longer available" warning appears.
Responsible	Gualotuña Brayan (Scrum Team - Developer)

6.2 US-10: Booking Time Restriction

ID	US-10
Role	As the System, I need to prevent bookings less than 12 hours in advance to give therapists prep time.
Estimation (Points)	5
Priority	High (1)
Acceptance Criteria	
Context	System Time Validation.
Event	• Patient attempts to book a slot. • System compares slot time with current Server Time.
Specific Behavior	If slot is > 12 hours away, booking is permitted.
Adverse Behavior	If slot is < 12 hours away, the slot is grayed out and disabled.
Responsible	Galarza César (Scrum Team - Developer)

7. Feature 6: Appointment Modification

Allows autonomy for patients to manage their schedule without relying on clinic receptionists.

7.1 US-11: Reschedule Session

ID	US-11
Role	As a Patient, I want to edit my appointment time so I can adjust my schedule if an issue arises.
Estimation (Points)	5
Priority	Medium (2)
Acceptance Criteria	
Context	Patient Dashboard - "My Appointments".
Event	• User selects "Edit". • Picks a new available slot. • Confirms change.
Specific Behavior	Original slot is freed up; new slot is reserved; updated confirmation sent.
Adverse Behavior	Editing is disabled if the appointment is less than 12 hours away.
Responsible	Erazo Isaac (Scrum Team - Developer)

7.2 US-12: Cancellation Policy Enforcement

ID	US-12
Role	As the System, I must enforce the cancellation policy so the clinic does not lose revenue on no-shows.
Estimation (Points)	3
Priority	High (1)
Acceptance Criteria	
Context	Appointment Cancellation Logic.
Event	• User clicks "Cancel Appointment". • System checks time difference.
Specific Behavior	If $<$ 12 hours, warning shows: "100% penalty applies. No refund will be issued."
Adverse Behavior	User cannot bypass the warning; cancellation proceeds but flags payment as non-refundable.
Responsible	Gualotuña Brayan (Scrum Team - Developer)

8. Feature 7: Payment Processing

Handles the financial transactions, specifically focusing on advance payments required to secure bookings.

8.1 US-13: Advance Digital Payment

ID	US-13
Role	As a Patient, I want to pay a 50% advance via credit card so my appointment is guaranteed.
Estimation (Points)	8
Priority	High (1)
Acceptance Criteria	
Context	Checkout Gateway.
Event	• User reaches payment step. • Enters card details for 50% of service cost.
Specific Behavior	Payment is processed, status changes to "Confirmed", receipt is generated.
Adverse Behavior	Declined cards return the user to the checkout screen without confirming the slot.
Responsible	Galarza César (Scrum Team - Developer)

8.2 US-14: Bank Transfer Registration

ID	US-14
Role	As a Patient, I want to upload a bank transfer receipt if I don't use credit cards.
Estimation (Points)	5
Priority	Medium (2)
Acceptance Criteria	
Context	Checkout - Transfer Option.
Event	• User selects Transfer. • Uploads screenshot of payment. • Submits.
Specific Behavior	Slot is set to "Pending Verification" until Admin approves the receipt.
Adverse Behavior	If no receipt is uploaded within 2 hours, the system automatically frees the slot.
Responsible	Erazo Isaac (Scrum Team - Developer)

9. Feature 8: Session Packages & Credits

Manages the logic for patients who purchase rehabilitation packages (e.g., 10 sessions) rather than single visits.

9.1 US-15: Deduct Completed Session

ID	US-15
Role	As a Therapist, I want to mark a session as completed so the system deducts it from the patient's package.
Estimation (Points)	3
Priority	Medium (2)
Acceptance Criteria	
Context	Therapist Dashboard.
Event	• Therapist marks appointment as "Completed". • System updates Patient Balance.
Specific Behavior	Remaining sessions counter decreases by 1.
Adverse Behavior	Cannot deduct from a package with 0 remaining sessions.
Responsible	Gualotuña Brayan (Scrum Team - Developer)

9.2 US-16: Display Remaining Balance

ID	US-16
Role	As a Patient, I want to see my available session credits so I know when to buy a new package.
Estimation (Points)	2
Priority	Low (3)
Acceptance Criteria	
Context	Patient Dashboard.
Event	• User logs in. • Dashboard queries remaining sessions logic: $RB = TP - (SC \times UC)$.
Specific Behavior	Displays large numeric counter: "You have X sessions left".
Adverse Behavior	If balance is 0, displays a prompt to "Purchase New Package".
Responsible	Galarza César (Scrum Team - Developer)

10. Feature 9: Automated Communications

Replaces informal WhatsApp messages with professional, automated system notifications.

10.1 US-17: Downloadable PDF Voucher

ID	US-17
Role	As a Patient, I want to download a PDF voucher of my booking to show at the reception.
Estimation (Points)	5
Priority	Medium (2)
Acceptance Criteria	
Context	Post-Payment / Dashboard Screen.
Event	• User clicks "Download Receipt". • System generates PDF.
Specific Behavior	PDF includes: Specialist Name, Date, Time, Amount Paid, and Clinic Logo.
Adverse Behavior	If generation fails, an on-screen digital QR code is provided as backup.
Responsible	Erazo Isaac (Scrum Team - Developer)

10.2 US-18: Pre-Appointment Reminder

ID	US-18
Role	As the System, I must remind the patient to arrive 15 minutes early to optimize clinical flow.
Estimation (Points)	3
Priority	Low (3)
Acceptance Criteria	
Context	System Cron Job.
Event	• System checks appointments for the next day. • Sends email reminder.
Specific Behavior	Email explicitly states: "Please arrive 15 minutes prior to your scheduled time."
Adverse Behavior	Emails bouncing back are flagged in the Admin dashboard.
Responsible	Gualotuña Brayan (Scrum Team - Developer)

11. Feature 10: Administrative Metrics

Provides the clinic owner (David Flores) with high-level data on the clinic's performance.

11.1 US-19: Clinic Occupation Dashboard

ID	US-19
Role	As an Admin, I want to view the Clinic Occupation Rate to understand how busy my specialists are.
Estimation (Points)	5
Priority	Medium (2)
Acceptance Criteria	
Context	Admin Control Panel.
Event	• Admin navigates to Metrics. • System calculates booked vs available slots.
Specific Behavior	Displays a Pie Chart showing the percentage of utilized clinical time.
Adverse Behavior	Time blocks manually blocked by therapists (lunch/breaks) are not counted as 'available'.
Responsible	Galarza César (Scrum Team - Developer)

11.2 US-20: Financial Credit Tracking

ID	US-20
Role	As an Admin, I want to track the Total Financial Credit Balance to know our liabilities in pending sessions.
Estimation (Points)	5
Priority	High (1)
Acceptance Criteria	
Context	Admin Control Panel - Finance.
Event	• Admin views Financial Metrics. • System aggregates all advance payments.
Specific Behavior	Displays total monetary value of sessions owed to patients.
Adverse Behavior	Cancelled appointments with 100% penalty are moved from 'Liabilities' to 'Earned Revenue'.
Responsible	Erazo Isaac (Scrum Team - Developer)
